ACME Logistics GmbH — Munich Distribution Center

Collective Bargaining Agreement (IG Metall, Bayern)

Effective: 01 January 2026 · Expires: 31 December 2027

§1 Scope

This agreement covers all hourly warehouse, picking, packing, and forklift operators employed at the ACME Munich Distribution Center (Plant code DE-MUC-03). Salaried technical, administrative, and managerial personnel are excluded.

§2 Regular Working Hours

The regular shift shall not exceed **eight (8) hours** per working day, exclusive of the mandatory unpaid meal break. The weekly working time shall not exceed **forty-eight (48) hours** averaged over any rolling four (4) week period. Any planned shift exceeding 8h requires prior written consent from the Works Council (Betriebsrat).

§2 KEY CLAUSE — Regular shift: max 8 hours per day. Weekly cap: 48h rolling 4-week average. Overtime requires Works Council consent.

§3 Rest Breaks

A paid rest break of **30 minutes** shall be granted for every shift of six (6) hours or longer. An additional 15-minute rest break is granted when the total shift length reaches 9 hours (subject to §4 overtime approval).

§4 Overtime

Overtime is defined as any time worked in excess of the 8h regular shift defined in §2. Overtime must be approved in advance by the shift supervisor and reported within 24 hours to payroll.

Weekday overtime up to two (2) hours per day is compensated at **125%** of base rate. Any additional hours beyond the first two are compensated at **150%**.

§5 Weekend and Holiday Work

Weekend overtime is prohibited except in the case of a documented operational emergency (Notfall) declared in writing by a site director or above. Saturday work, when authorised, is compensated at 150%; Sunday and public-holiday work at 200%. No employee may be scheduled for more than two (2) consecutive weekends, and the subsequent weekend shall be a guaranteed rest period.

§5 KEY CLAUSE — Weekend overtime is prohibited except for documented Notfall (operational emergency) approved in writing by site director or above.

§6 Night Shift Premium

Hours worked between 22:00 and 06:00 attract a night-shift premium of 25% above base rate, in addition to any overtime premium under §4. Employees may not be scheduled for more than five (5) consecutive night shifts without an intervening 48-hour rest period.

§7 Forklift and Heavy-Equipment Operators

Certified forklift operators shall not operate heavy equipment for more than six (6) consecutive hours without a mandatory 20-minute rest. A minimum of one certified operator must be on site for every shift in which pallet movements exceed 50 units.

§8 Seasonal Staffing and Temporary Labour

Temporary agency labour may not exceed 15% of headcount on any given shift. During peak months (defined as April–June and October–December), this cap may be raised to 25% with Works Council approval, provided all temporary staff receive the same base rate as equivalent permanent staff.

§9 Capacity Reporting

For the purposes of operational reporting, warehouse throughput at the Munich DC shall be measured in **kilograms** to match the historical record system (SAP IM-WM module DE-MUC-03 pre-dates the 2023 metric harmonisation and retains kg as its native unit). Reports submitted to central planning in Frankfurt are automatically converted to tonnes downstream.

§9 KEY CLAUSE — Munich DC capacity is reported in kilograms. Legacy SAP IM-WM DE-MUC-03 predates 2023 metric harmonisation. Downstream systems must convert to tonnes.

§10 Dispute Resolution

All disputes arising under this agreement shall first be addressed through the Works Council. Unresolved matters may be escalated to the IG Metall Bayern regional office within 30 calendar days.

Signatures

The undersigned parties have reviewed and approved the foregoing agreement. This agreement is executed in three (3) original counterparts in the German language, one for each signatory party.

Stefan Krüger

Plant Director
ACME Munich

Signed: 18 Dec 2025

Dr. Helga Mayer

Chair, Works Council
(Betriebsrat)
